

**Sample Testing Service:** US Centrifuge offers sample testing to help customers evaluate the feasibility of their applications. This testing procedure provides a quick and inexpensive way to evaluate an application. US Centrifuge processes your sample at our facility using a model M212 manual clean centrifuge and a De Laval Gyro-tester to determine the results, which are then noted and digitally photographed for your review and consideration.

**Example video on You Tube.com: In House Sample Testing Program with model M212 Centrifuge**

- **DTR industrial plant wastewater:** <http://www.youtube.com/watch?v=v4tG7gqWr9Q>

**E-mailed photo documentation includes:**

- Raw liquid sample (solids%/volume).
- Centrifuged liquid sample (solids%/volume) determines separation results.
- Sludge cake sample.

**Sample testing fee:**

- a) **\$250.00** per customer test.
- b) The fee is applicable to the equipment purchase price.
- c) Laboratory test results are available per the lab cost.

**Sample testing requirements:**

- 1) Completed US Centrifuge sample application sheet form must be faxed prior to testing samples.
- 2) PO to cover the testing fee is required prior to shipping samples to US Centrifuge.
- 3) Return shipping instructions must be included for samples that cannot be disposed of at USC, or an environmental fee will be charged to cover disposal.
- 4) 5-gallon bucket with representative sample is preferred.
- 5) 5-gallon bucket must include the necessary MSDS sheets and copy of USC Sample Testing Application Request Sheet.
- 6) Testing is typically processed within a couple of days of receiving the sample and information.
