

**Up to 50-gpm (10m3) Refurbished CQ3 Solid Bowl  
Decanter Centrifuge Skid Package with Viscotherm  
Hydraulic Back-Drive and 480vac 60hz 3ph Control Panel**

**Also includes feed macerator and progressive cavity feed  
pump with VFD pump feed rate control plus centrate tank  
with transfer pump**

**Also includes 10' belt conveyor**

**(1) One 2007 CQ3  
Decanter Centrifuge  
Skid Package Available  
fully Re-built with  
Warranty**

**The CQ Decanter  
Centrifuges are very  
versatile and capable of  
adapting to varying  
throughputs as well as a  
wide variety of sludge  
dewatering applications  
and processes.**

**The machines are easy  
to adjust, require little  
operator attention, are  
relatively quiet, and  
feature a complete  
package with a small  
footprint.**

**The CQ Decanter Centrifuges feature the following unique advantages:**

1. Patented **dual angle conical bowl section** for decreased erosion and increased scroll life with lower torque sludge discharge.
2. Low weight rotating assembly constructed from high tensile strength and highly corrosion resistant **Duplex Stainless Steel**.
3. **Energy efficient** for low power consumption.
4. **Replaceable wear liners** at points in contact with solids for easy on site replacement and servicing.
5. **Automatic, hydraulic scroll back-drive system** requires no gearbox and has high torque capability independent of the main drive. Any residual solids in the bowl can be discharged with the bowl stopped.

• Model	Motor	Bowl Dimensions	Max "G"	Flow rate
• CQ3	25HP	4:1 L/D 12" x 48"	3,375 "G"	up to 50-gpm
